## Dreamweaver Introduction for Windows

### **Course specifications**

Course number: 078914

Software version number: 3.0

Course length: 1 day(s)

### **Course description**

**Overview:** Students will learn to create Websites using Macromedia Dreamweaver 3.0.

**Prerequisites:** You must be familiar with the basic operation of the Windows operating system to take this course.

**Delivery method:** Instructor-led, group-paced, classroom-delivery learning model with structured hands-on activities.

**Benefits:** Students will learn how to create a Web site by importing and formatting text and images, adding links, creating tables, using frames, and uploading the site to a remote Web server.

**Target student:** Students enrolling in this course should understand the basics of using the Windows operating system, including copying files from CDs, as well as opening and saving files.

**What's next:** This course, Dreamweaver 3.0 Introduction, is the first course in this series. Students who want to learn advanced features can take Dreamweaver 3.0 Advanced.

### **Performance-based objectives**

Lesson objectives help students become comfortable with the course, and also provide a means to evaluate learning. Upon successful completion of this course, students will be able to:

- Explain basic concepts about the Internet and the World Wide Web, and how to publish a site.
- Navigate in the Dreamweaver work environment.
- Create a basic web page by typing text and importing graphics.
- Design a site from scratch, beginning with developing a site map, through final upload of the site to a web server.
- Import text into Dreamweaver pages using several methods.
- Perform character and paragraph formatting on text, and define and apply HTML styles to speed up repetitive formatting.
- Add links within a site, create anchors, and specify external links.
- Create and format tables to assist in page design.
- Use images as links and create image maps.
- Build a frame-based site to assist the viewer in navigation.
- Upload a site to a remote web server.
