Netscape Navigator 3.0: Introduction

Course specifications

Course number: 74-910
Software version number: 3.0
Course length: 1 day

Course description

Overview: Students will obtain an overview of connecting to and navigating within the Internet and World Wide Web in the Windows environment. This book was written for the Windows 95 platform, but it will run on Windows 3.1.

Prerequisites: *Windows 95: Orientation* or equivalent knowledge.

Delivery method: Instructor-led, group-paced, classroom-delivery learning model with structured hands-on activities, or instructor demonstrations, or lecture/lab with a few Internet setups and students sharing workstations.

Benefits: Students will learn what the Internet and World Wide Web are, and how to connect to them, as well as how to find information and download it, and communicate with others through email and newsgroups.

Target student: Students enrolling in this course should understand how to use Windows applications and have experience using the mouse.

What's next: *Netscape Navigator 3.0: Introduction* is the first course in this series. *Using the Internet*, the next course in this series, goes more in depth into topics explored in this book.

Performance-based objectives

Lesson objectives help students become comfortable with the course, and also provide a means to evaluate learning. Upon successful completion of this course, students will be able to:

- Explore the basics of the Internet: its history, structure, resources, functionality, addressing schemes, and connection requirements.
- Connect to the Internet using Netscape 3.0.
- Explore the World Wide Web using Netscape.
- Find specific information on the Internet using Gopher, Veronica, Jughead, FTP, Archie, and Web search engines.
- Download files from FTP sites.
- Communicate with others using email, mailing lists, and newsgroups.
- Access resources for new Internet users including FAQs, RFCs, new-user Web pages, Web page repositories, and security tips.
- Create a PowerStart Page to help simplify accessing the Internet.
- Create their own Web page using HTML language.
