## Understanding the Internet

### ***Course specifications***

Course length: 1/2 day

### ***Course description***

**Overview:** Students will be introduced to the terms and structure of the Internet, World Wide Web, and web site development.

**Prerequisites:** Windows 95/98/2000/Me: Orientation or equivalent knowledge.

**Delivery method:** Instructor-led, group-paced, classroom-delivery learning model with structured hands-on activities.

**Benefits:** Students will learn what the Internet and World Wide Web are, components of a typical web page, typical processes for accessing web pages.

**Target student:** Students enrolling in this course should understand how to use Windows applications and have experience using the mouse.

### ***Performance-based objectives***

Lesson objectives help students become comfortable with the course, and also provide a means to evaluate learning. Upon successful completion of this course, students will be able to:

- Define terms associated with the Internet and World Wide Web
- Define terms associated with a web site and the development of web sites
- Describe the components of a typical web page
- Summarize the typical process for accessing a web page
- Recall the four purposes for a web site.

### ***Course content***

Lesson 1: Overview of the Internet and the World Wide Web

Lesson 2: Web Site Terms

Lesson 3: Development Terms
